Join the Movement: Plant Mangroves Along Indonesia's Coastlines!

At ICONIC 2024, we don't just discuss ideas - we turn them into action. In collaboration with LindungiHutan, we're committed to environmental conservation and low-carbon development in Indonesia. As we gear up for our international conference, we're rolling up our sleeves and getting our hands dirty to create a tangible impact.

We're launching a campaign to plant mangroves along the coastal line of Indonesia, starting in Pasisir Pamanukan, West Java. This area has faced severe flooding in recent years due to heavy rainfall and erosion. By planting mangroves, we can enhance coastal resilience against erosion and contribute to climate change adaptation efforts. Join us in making a positive impact on Indonesia's environment and future.
